

Evaluation of Food Contact Materials legislation

Fields marked with * are mandatory.

Introduction

Food Contact Materials (FCM) includes all **food packaging** as well as **kitchenware, tableware and food appliances** such as cutlery, cups, plates, bowls etc. It may also include articles which were not originally intended for food contact but which may nevertheless foreseeably come into contact with food, such as paper napkins. Furthermore, FCM covers materials used in professional food manufacturing, preparation, storage and distribution – from chocolate conveyor belts to milk tankers. Many different types of material may be used to make FCM including plastic, paper, rubber, metal and glass but also adhesives, printing inks and coatings used in the finishing of the final articles, as well as composite materials.

Example of food contact materials (FCMs), clockwise from top-left: Plastic tray and cling film packaging used to wrap apples; printed paper packaging used to wrap butter; re-usable plastic boxes for storing food; cutlery made from bamboo

EU legislation on FCMs requires businesses to manufacture FCMs so that under intended or foreseeable use they **do not endanger human health or bring about an unacceptable change in the composition or deterioration in the organoleptic properties – taste and smell, for example – of the food.**

The Regulation concerns only the safety of the FCM as regards the transfer of chemicals into the food from the FCM. The rules do not set any hygienic requirements for FCM; nor do they cover the waste or

environmental impact of FCMs, which are dealt with under other EU legislation.

The Regulation also aims to ensure the **effective functioning of the European Union market** i.e. to avoid restrictions or tariffs.

WHAT IS THIS QUESTIONNAIRE ABOUT?

This questionnaire is part of a consultation exercise being undertaken to gather the views and in particular evidence from a wide range of stakeholders on the functioning of the FCM legislation as part of an ongoing evaluation exercise. As the legislation is aimed at protecting consumers, Part I of the questionnaire is particularly important, **to obtain direct views from citizens, as consumers.**

INFORMATION ON THE QUESTIONNAIRE.

This Online Public Consultation questionnaire is structured as follows:

- **Introduction:** This part will ask you to provide information about yourself.
- **Part I:** The second section is addressed to citizens. Respondents should ideally not have any specialist knowledge on food contact materials.
- **Part II:** This part is addressed to experts or those with prior knowledge of the FCM legislation and working in the field. Some additional questions also exist depending on the type of organisation that you are responding on behalf of.

Part I of the questionnaire for citizens only should take you no more than 15 – 20 minutes to complete. Part II of the questionnaire for those with knowledge of FCMs, including organisations, businesses, and public authorities should take no more than 30 minutes to complete.

Fields marked with * are mandatory.

THE RESULTS

The consultation period will last 12 weeks. Once the evaluation of the FCM legislation is completed, a synopsis report of all consultation activities will be published on the consultation page

* The current EU assessment and authorisation process is effective in ensuring the safety of <i>the final FCM</i>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input checked="" type="radio"/>	<input type="radio"/>

Harmonised rules for all FCM are needed. No unassessed chemicals in final articles should be accepted. Risk assessment must include other sources of exposure, and more focus is needed on protecting consumers against EDCs and non-threshold chemicals in general. See the five new key principles for the future food contact legislation <https://chemtrust.org/5-key-principles-fcm/>

* Are you aware of any contradictions, gaps, overlaps, inconsistencies or missing links between the EU FCM legislation and other EU legislation, in particular on chemical safety or products? This may include other areas, which you consider should be legislated together with FCM in the same legislation or legislative framework?

New data, new classification, SVHC identification and restriction under REACH and other legislation must lead to immediate and adequate restrictions in FCM. Focus should be on EDCs, DNTs and other substances of high concern.
The exemptions in REACH article 14,5 and 56, 5b are not warranted as long as no similar safety provisions for FCM are in place

* Is it better to have specific FCM rules which are applicable throughout the EU, or to have individual Member State legislation?
